IAEG® reserves the right to add to, change or delete its contents or any part thereof without notice.

IAEG Regulatory Criteria

Each declarable substance is listed on the AD-DSL because information on the usage of that substance in the aerospace and defence (AD) supply chain is of concern to the International Aerospace Environmental Group® (IAEG®) for chemicals management and reporting purposes.

Regulatory criteria, established by IAEG® and defined below, are allocated to each entry in the AD-DSL to which they apply. The IAEG® regulatory criteria that apply to each AD-DSL entry are provided for information purposes only. They give users an indication of why a substance has been included to the list. The presence or absence of any IAEG® regulatory criterion is not an indication of whether a substance may or may not be used in AD products or processes.

Restricted in articles (R1):

At least one regulation, in one or more regions, restricts (totally or partially) the presence of the substance in AD articles and/or requires an authorization/permit in order to continue to use the substance in articles.

Restricted in substances and mixtures (R2):

At least one regulation, in one or more regions, restricts (totally or partially) the use of the substance (either alone or in mixtures) and/or requires an authorization/permit in order to continue to use the substance.

Declarable in articles (D1):

At least one regulation, in one or more regions, requires the disclosure of the substance when present in AD articles.

Of Interest (I):

The substance is not currently identified as meeting any criteria for R1, R2 or D1; however it may be otherwise regulated in one or more regions.

The substance is of interest due to uses in AD applications and may have been identified as a candidate for future regulatory activity in at least one region.
