Terms and Conditions of Use of the IAEG™ Aerospace and Defense Declarable Substances List ("AD-DSL")

This document is released for the purpose of establishing a standardized list for supplier materials declaration for the Aerospace & Defense industry.

Any further distribution or use requires the written consent of IAEG in accordance with our copyright statement below.

© 2019 IAEG®

The International Aerospace Environmental Group® ("IAEG") is the owner of this material. This material may not be used for any purpose other than that for which it is provided without the express written consent of IAEG®. IAEG® will accept no liability for any damages from any use of this material including without limitation any direct, indirect, incidental, special and consequential damages, loss of data, income, profit or goodwill, loss of or damage to property or claims of third parties. IAEG® reserves the right to add to, change or delete its content or any part thereof without notice.

IAEG Regulatory Criteria

Each declarable substance is listed on the AD-DSL because information on the usage of that substance in the aerospace and defence (AD) supply chain is of concern to the International Aerospace and Defence Industry (IAEG®) for chemicals management and reporting purposes. Regulatory criteria, established by IAEG® and defined below, are allocated to each entry in the AD-DSL to which they apply. The IAEG® regulatory criteria that apply to each AD-DSL entry are provided for information purposes only. They give users an indication of why a substance has been included to the list. The presence or absence of any IAEG® regulatory criterion is not an indication of whether a substance may or may not be used in AD products or processes.

**Restricted in articles (R1):**
At least one regulation, in one or more regions, restricts (totally or partially) the presence of the substance in AD articles and/or requires an authorization/permit in order to continue to use the substance in articles.

**Restricted in substances and mixtures (R2):**
At least one regulation, in one or more regions, restricts (totally or partially) the use of the substance (either alone or in mixtures) and/or requires an authorization/permit in order to continue to use the substance.

**Declarable in articles (D1):**
At least one regulation, in one or more regions, requires the disclosure of the substance when present in AD articles.

**Of Interest (I):**
The substance is not currently identified as meeting any criteria for R1, R2 or D1; however it may be otherwise regulated in one or more regions. The substance is of interest due to uses in AD applications and may have been identified as a candidate for future
