BY DOWNLOADING, COPYING OR OTHERWISE USING THE LICENSED MATERIALS, YOU ACKNOWLEDGE THAT YOU HAVE READ AND UNDERSTAND THIS AGREEMENT, AND ARE BOUND BY ITS TERMS. IF YOU CANNOT OR DO NOT AGREE TO BE BOUND BY THIS AGREEMENT, YOU AGREE TO NOT USE THE LICENSED MATERIALS IN ANY FORM, FOR ANY PURPOSE.

IAEG Regulatory Criteria

Each declarable substance is listed on the AD-DSL because information on the usage of that substance in the aerospace and defence (AD) supply chain is of concern to the International Aerospace Environmental Group (IAEG) for chemicals management and reporting purposes.

Regulatory criteria, established by IAEG and defined below, are allocated to each entry in the AD-DSL to which they apply. The IAEG regulatory criteria that apply to each AD-DSL entry are provided for information purposes only. They give users an indication of why a substance has been included to the list. The presence or absence of any IAEG regulatory criterion is not an indication of whether a substance may or may not be used in AD products or processes.

Restricted in articles (R1):

At least one regulation, in one or more regions, restricts (totally or partially) the presence of the substance in AD articles and/or requires an authorization/permit in order to continue to use the substance in articles.

Restricted in substances and mixtures (R2):

At least one regulation, in one or more regions, restricts (totally or partially) the use of the substance (either alone or in mixtures) and/or requires an authorization/permit in order to continue to use the substance.

Declarable in articles (D1):

At least one regulation, in one or more regions, requires the disclosure of the substance when present in AD articles.

Of Interest (I):

The substance is not currently identified as meeting any criteria for R1, R2 or D1; however it may be otherwise regulated in one or more regions.

The substance is of interest due to uses in AD applications and may have been identified as a candidate for future regulatory activity in at least one region.
